KEEPS PLANES IN AIR The basic secret of keeping an airplane up is the thickened shape of the wings, more sharply curved on the upper than on the lower surfaces. Thus the air has to travel farther over the upper surface, creating less pressure than below, so that the greater pressure below the wing pushes the air against the tilted lower surface also contributes to the lifting force. VACCINE CERTIFICATES Vaccination certificates are necessary for travelers desirous of entering Canada. This order will remain in force throughout Canada until any threat of a smallpox epidemic has disappeared.

County Renews Lease On Beach Recreation Area Renewal of the lease of premises at 315 Diamond street in Redondo Beach, occupied by the County Department of Parks and Recreation as a garage and warehouse, was approved by the Board of Supervisors at a recent meeting, on motion of Supervisor Raymond V. Darby. The renewal is for a period of one year beginning May 1, 1946 at a rental of \$85 per month, with option for renewal of one additional year at \$110 per month, the county to assume all utility bills and interior maintenance and repairs. The property consists of a brick garage having approximately 5,700 square feet of floor space. While this constitutes an increase in the rental of approximately \$30 a month, it still provides space at approximately 20c per square foot per year.
